## Farewell

*Dear My Friend;*

*Nothing a kid growing up in Aydınlıkevler could ever have imagined in his wildest dreams could have prepared him for an incredible journey of designing & preparing the first English aviation periodical as a global communication conduit for Turkish aviation...*

*As you may know that the Aviation Turkey magazine was the first materialized form of my dream of decades...  
...and the DT Media company who wanted to invest & manage in this dream, some of my friends wanted to join us with their valuable articles, so we've created Aviation Turkey magazine in first half of 2019 together.*

*After a combined two years, my time with Aviation Turkey magazine teams as the Chief Advisor for the Editorial Board came to an end a couple months ago, during this difficult time for the entire aviation industry.*

*My last involvement with my private projects (i.e. @Team Aviation Clubs and Business Cockpit Interviews) only was in the last issue of 2020 which was #8...*

*My time here in aerospace and aviation has been filled with numerous "Once in a Lifetime" experiences and memories for which I am deeply grateful... So the Aviation Turkey Journey was definitely one of them...*

*I will miss the friendships along this journey, both inside and outside of the magazine. Here's hoping that our paths cross again.*

*I hope the Aviation Turkey brand will continue to inspire people of aviation in all corners of the world. It has been a privilege working together with this remarkably talented team, to strengthen and represent it during both good and difficult times.*

*Best,  
Can EREL*

## Global Communication Conduit Of Turkish Aviation

# AVIATION TURKEY

Conceptual Planning & Design Phase (16.04.2019 Ankara)

*"Yesterday, the sunlight trickled through the clouds  
Today, as we ascend, it shines on our face with all of its brilliance  
Tomorrow, we will soar together into the future ..."*

### Vision:

"To be a trusted and reputable publication covering all aspects of global aviation."

### Mission:

"To become a reliable and elite window of Turkish aviation while following the development of the aviation industry within global norms, qualifications and values with the understanding of bidirectional flow between national and international ecosystems with content covering the status of intellectual, scientific and academic, technological, professional, social & cultural developments. To be a trusted and reputable publication covering all aspects of global aviation in the region."

### Code of Ethics:

"Aviation Turkey publicly announces that it adheres to the 'Code of Professional Ethics of the Press' with each of employees while operating in the aviation industry with global norms, qualifications and values."
